I am a pupil under instruction. On 13.6.18. at 5.10 p.m. I went up in Avro-Mono No. 4340 to carry out general practice. The wind was blowing from S.W. at approximately 30 miles per hour, and it was very gusty. I ran into clouds at 1500 feet, so decided to make a couple of landings before returning to hangar. I landed once, took off again and made a circuit to do another landing. I glided down to land, dead into the wind by the "smudge fire". When 30 yards from stone wall on N.E. of 'drome and 40 to 50 feet in air my right wing got into an air pocket and dropped. I immediately put on engine, but engine would not pick up. The machine then hit the wall, one of the wheels probably striking the top of the wall. I switched off, and pulled back the throttle. I put up my arm to save injuring my face, but nevertheless sustained bruises to the eyes, a bent nose, and a severe jar on the head. I was strapped in and was on duty during the practice.

### Commonwealth War Graves Commission Headstones

The Commonwealth War Graves Commission cares for cemeteries and memorials in 23,000 locations, in 153 countries. In all 1.7 million men and women from the Commonwealth forces from WWI and WWII have been honoured and commemorated in perpetuity.

The Commonwealth War Graves Commission, as part of its mandate, is responsible for commemorating all Commonwealth war dead individually and equally. To this end, the war dead are commemorated by name on a headstone, at an identified site of a burial, or on a memorial. War dead are commemorated uniformly and equally, irrespective of military or civil rank, race or creed.

Not all service personnel have a Commonwealth War Graves Commission headstone. In some instances the relative chose to have their own memorial/headstone placed on the deceased's grave. These private headstones are not maintained by the CWGC as they have no jurisdiction to maintain them.

Lieutenant Howard Charles Reid Nelson has a numbered flat memorial stone & is remembered on the CWGC's Screen Wall in Welford Road Cemetery, Leicester.

## Welford Road Cemetery, Leicester, Leicestershire, England

Between 1914 and 1919, the 5th Northern General Hospital, with more than 2,600 beds, occupied several buildings in Leicester and North Evington. More than 95,000 officers and men were admitted to the hospital, which recorded 514 deaths before its closure. During the Second World War, there was a Royal Air Force operational training station near Leicester. Leicester (Welford Road) Cemetery contains 286 First World War burials, more than half of them forming a war graves plot with a Screen Wall bearing the names of those buried there. The 46 Second World War burials are scattered throughout the cemetery, which also contains eight Belgian war graves, 1 of which is unknown.
